

# Implementation & Advisory Services

Receive expert support during the deployment of your Sourcegraph platform and receive ongoing guidance as you scale, upgrade, and roll-out new features to optimize system health and user experience.

## Faster time to value

## Optimized system health and performance

## Reduced risk, resourcing burden, & cost

### Overview

An intensive implementation project to get your customized production environment up and running. We guide you on the plan, design, installation, setup, and configuration.

Following your deployment, you receive ongoing access to our deployment experts to support you as you maintain, upgrade, optimize, scale, and roll out new features.

### Outcomes

- ✓ A comprehensive implementation plan and design
- ✓ Fully deployed production environment built to-spec
- ✓ A solid foundation and healthy instance to onboard your users
- ✓ Consistent and proactive support in ongoing instance maintenance tasks
- ✓ Access to experts to ensure your instance is configured to optimize usage, feature adoption, and system health

### Activities

- Joint deployment planning
- Infrastructure build
- Sourcegraph installation & configuration
- Instance validation, testing, & go-live
- Annual Health Checks
- Expert infrastructure support
- Scaling and stability assistance
- Advanced and complete feature configuration
- Proactive upgrade support

### Benefits

With our dedicated team of implementation experts, you will see:

- ✓ Faster time to value with a quicker, more efficient implementation
- ✓ Reduced risk of implementation project failure
- ✓ Tailored deployment solutions to meet your specific business and technical requirements
- ✓ Improved adoption and utilization through a higher quality implementation, faster upgrades, and more complete instance configuration
- ✓ Access to Sourcegraph experts through the life of your self-hosted instance

### Packages

Implementation Services are packaged as either a 45 day or 90 day implementation project depending on the needs and complexity of your organization, followed by ongoing proactive activities performed by Sourcegraph implementation Engineers.

#### Standard Implementation

45 Days - \$10,000

#### Advanced Implementation

90 Days - \$25,000
