**Sourcegraph**

Implementation Services

Receive expert guidance and support during the deployment of your Sourcegraph platform or outsource your admin's work by letting us manage and support your instance.

Faster time to value

Increased value, always up-to-date

Reduced risk, resourcing burden, & cost

Overview

An intensive implementation project to get your customized production environment up and running. We guide you on the plan, design, installation, setup, and configuration.

Outcomes

✓ A comprehensive plan and design

✓ Fully deployed production environment built to-spec

✓ A solid foundation and healthy instance to onboard your users

Activities

- Joint planning and design
- Infrastructure build
- Sourcegraph installation
- Instance configuration
- Validation & testing
- Go-Live

Benefits

With our dedicated team of implementation experts, you will see:

✓ Faster time to value with a quicker, more efficient implementation

✓ Reduced risk of implementation project failure

✓ Tailored deployment solutions to meet your specific business and technical requirements

✓ Improved adoption and utilization through a higher quality implementation

Packages

Implementation Services are packaged as either a 45 day or 90 day implementation project depending on the needs and complexity of your organization.

Standard Implementation
45 Days - $10,000
